exquisite reasons
why choosing a
SafeGuard
Composite Door
will turn your house
into your home

SafeGUARD
COMPOSITE DOOR COLLECTION

1ST

SafeGuard Composite Doors you'll love them!

All SafeGuard doors offer high quality protection for your home, as well as beauty that's much more than skin deep. Their richly grained surface is extremely durable, with a look and feel of a traditional timber door – but requires only minimal maintenance.

CHOICE OF
COLOURS

BACKGROUND

A SafeGuard door has been designed to be both attractive and practical. We have a variety of distinctive doors and decorative glass ranges. All are available in a wealth of colours so you can design a door that makes a personal statement about you and your home. You'll also find lots of little design touches that set our doors apart from others ensuring your home can stand out from others around you.

When it comes to practicality, a SafeGuard Composite

Door more than measures up. It meets and exceeds all the UK's **security standards** for domestic doors as well as offering exceptional protection from the elements, something that's reflected in the fact that it's one of the most thermally efficient doors you can buy. Reducing heating bills and your carbon footprint.

CHOICE

There are three SafeGuard ranges to choose from, The Traditional Range, The Contemporary Range and The NEW Cottage Range offering over 50 standard door styles. Nine standard colour options and a choice of over 36 Prestige colours. When combined with over 100 decorative glass options that's a range of over 250,000 options!

Ultra secure multi point locking comes as standard on all our doors with a variety of high quality hardware that complements and enhances your door, from chrome handles to security chains and spy hole viewers.

For the ultimate finishing touch choose from one of our extensive decorative glass ranges. From traditional to modern, or even ultra modern with contemporary styles, the choice is vast. We offer triple glazed units for high performance heat and sound insulation.

Our triple glazed units have the added advantage of protecting the decorative centre pane. It prevents

oxidisation of the lead coming (often associated with decorative double glazing) and keeps the intricate glass designs clean and dust free. A wipe over the smooth glass outer panes is all it takes to keep your decorative glass clean and sparkling.

So whether you want a traditional or modern entrance to your home our SafeGuard door range will have a door for you.

2ND

why our doors are number 1

SafeGuard composite doors are one of the UK's leading brands of residential doors, manufactured and assembled using only the best of components, you can rest assured these hand built doors are amongst the best available.

STUNNING
AESTHETICS

UNPARALLELED
SECURITY

EXCEPTIONAL
DURABILITY

EXCELLENT
WEATHERPROOFING

SUPERB
SOUND
INSULATION

LOW
MAINTENANCE

STUNNING AESTHETICS

The woodgrain finish on a SafeGuard composite door was developed from oak tree grain, creating a beautifully authentic appearance. Unlike lesser doors, you'll find the same woodgrain effect and moulding design on the slim glazing cassette too, giving a seamless, elegant finish and impressive kerb appeal.

UNPARALLELED SECURITY

A SafeGuard GRP composite door offers ultimate security thanks to its rigid polymer subframe, high density CFC-free polyurethane foam core, high impact resistant GRP skin and high quality multi-point locks. This is reflected in its PAS 24 2016 Enhanced Security accreditation and Secured by Design endorsement, the official UK Police initiative supporting 'designing out crime'. You might also like to know tests show that a SafeGuard GRP composite door cannot be forced within a reasonable time frame, even with the aid of a police-issue battering ram. All SafeGuard doors are fitted with a 3 Star Ultion Diamond cylinder (see page 7).

EXCEPTIONAL DURABILITY

A SafeGuard GRP composite door's high impact resistant glass reinforced polyester (GRP) skin will maintain its pristine appearance in the face of everyday knocks and scratches and beyond. This durability is reflected in the comprehensive manufacturer's structural and surface warranties that come with every SafeGuard GRP composite door.

EXCELLENT WEATHERPROOFING

A SafeGuard GRP composite door has water resistant polymer composite rails that protect its core. This means it won't suffer from water absorption which can lead to skin delamination and cause functional problems that lesser products have. Your door will keep the weather at bay and stay looking good for longer.

SUPERB SOUND INSULATION

A SafeGuard GRP composite door has a weighted noise reduction of 31 decibels. It means you can be sure your new door will keep outside noise to a minimum, helping to make your home the haven you want it to be.

LOW MAINTENANCE

Everything about a SafeGuard GRP composite door is designed to be easy to maintain, including the triple glazed insulated glass unit which encapsulates the delicate decorative glazing between two panes of clear glass, protecting it and making it easy to keep clean. An occasional wipe down with warm soapy water and a soft cloth is all a SafeGuard door needs to keep it looking great.

3RD feeling safe & secure

All SafeGuard composite doors are fitted with a top quality multipoint locking system as standard and have been tested under stringent independent conditions against 'intruder attack'.

The SafeGuard door has been certified to PAS23 and PAS24 standards. PAS24 is an enhanced security performance test that not all doors can achieve, so if you want to ensure your home has the highest level of security you should always ask for a SafeGuard door by name.

fitted as standard

Millions of doors in the UK can be opened quietly in under 20 seconds with normal tools.

Even the most secure multi-point hook mechanisms are disabled when the cylinder lock is snapped or bumped.

To guard against this all SafeGuard Composite doors are now fitted with the ultion locking cylinder as standard. The ultion lock has been designed to offer the ultimate defence against this and other well known cylinder lock attacks.

4TH

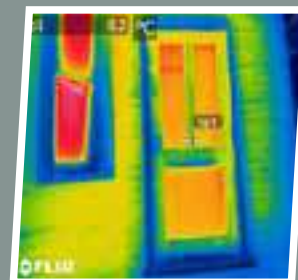

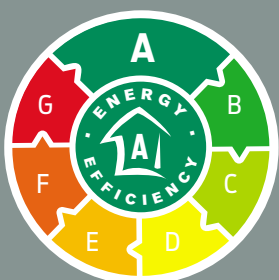

energy efficiency

A SafeGuard composite door is more energy efficient than a traditional timber door or a solid timber core composite door – **fact!**

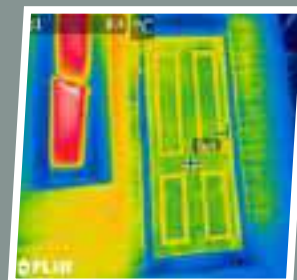

These days, we all worry about how much energy our homes use. The rising cost of our energy bills and our impact on the environment mean we want to keep our consumption to a minimum.

One of the best ways to do this is to choose thermally efficient products that keep warmth in and cold out, saving money and emissions.

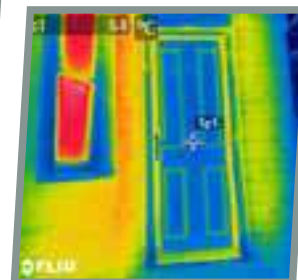

When it comes to thermally efficient doors, a SafeGuard GRP composite door is the best choice you can make.

Traditional timber panelled door

Solid timber core composite door

SafeGuard composite door

The alphabetical, colour coded scales shown in this brochure follow the same grading system as that found in white goods with 'A' representing the most energy efficient.

The photos show the thermal efficiency of each of the doors we tested. The darker the blue, the less heat is being lost. Reds and greens – the predominant colours on the timber door – indicate high heat loss.

19% More thermally efficient than a 48mm solid timber core composite door.
17% More thermally efficient than a 44mm traditional panelled door.

Doors were tested at the University of Salford's Energy House. This represents a typical Salford 1919 terraced house and its construction represents 21% of the UK's current housing stock. The house has been reconstructed in a fully environmentally controllable chamber, in which climatic conditions can be maintained, varied, repeated and patterns monitored. For the test, the inside temperature of the Energy House was 25°C with an exterior temperature of 5°C.

technical information

CONSTRUCTION

Every SafeGuard composite door is manufactured to the highest of standards to ensure it is strong, durable and secure. We have sold tens of thousands of doors to date, evidence of the quality and exacting specification we demand.

The door has a perimeter sub-frame of a solid, water-resistant polymer material, which is reinforced with Laminated Veneered Lumber (LVL). A thermoset GRP skin is bonded to this sub-frame and the core of the door is then filled with high density, 100% CFC-free polyurethane foam. Finally, water resistant polymer composite rails protect the core from damage or water absorption.

The door's core is what makes it so thermally efficient and so good at reducing sound. In fact, as you can see from the

images on page 8, it is the most thermally efficient door on the market, increasing your home's energy efficiency and saving you money on your energy bills.

The high impact resistant thermoset GRP skin not only keeps your door looking good, it will not expand and contract laterally so your door will not crack or delaminate. All standard solid colours are pre-pigmented and beautifully through-coloured. All other colours are oversprayed with a durable paint that will not peel or crack.

TECHNICAL FIGURES

A SafeGuard composite door has a wealth of facts and figures that prove its quality. The door:

- achieves BS 6375-1 for weather tightness, air, wind and water
- PAS24: 2016 Enhanced Security Standard, a prerequisite for achieving Secured by Design status
- reduces outdoor noise by an average of 31dB
- achieves Global Warming Potential (GWP) score of less than 5 and Ozone Depletion Potential (ODP) score of zero
- meets UK Building Regulations U value requirements of 1.6 W/M2K

In other words, everything about a SafeGuard composite door has been designed to enhance your home for years to come.

CARE AND MAINTENANCE

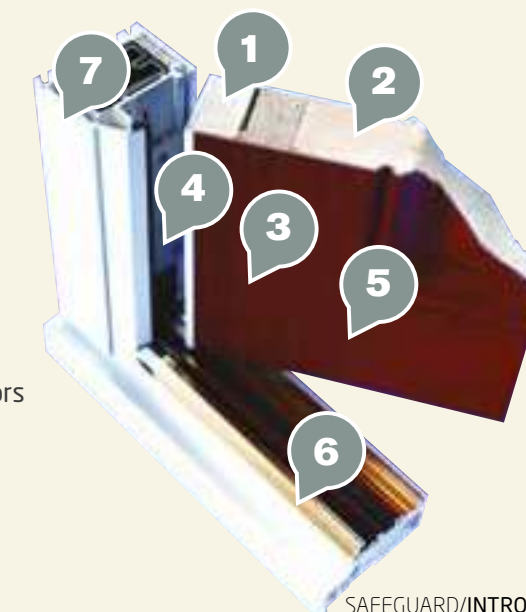

Your SafeGuard composite door has been designed to be easy to maintain. To keep your door clean, prolong the life of the surface finish and protect your warranty, we recommend you wash it regularly using warm soapy water (washing up liquid is ideal) and a soft, lint-free cloth. If you live in a coastal area, in a heavily industrialised area or near a main road, you may need to clean your door more frequently. Some surface colours will degrade over time due to exposure to UV.

It is important that you DO NOT use any of the following on your door, as this may damage the surface finish.

- abrasive cleaners or scouring pads
- any type of bleach or solvent (e.g. white spirit, methylated spirit, cellulose thinners, acetone or nail varnish remover)
- any type of adhesives or tack for providing temporary protection or fixing of seasonal or other decorations etc
- high pressure or steam cleaners

what makes our doors the best

1. Stable solid water resistant ploymer stiles and rails. Reinforced with [LVL] timber
2. High density insulation foam core
3. High impact resistant grained GRP skins
4. Full face aluminium hinge and lockplates on all standard doors
5. Weather tested to BS6375
6. Slim low step over aluminium threshold with twin seals Part M compliant available
7. Dedicated 70mm reinforced PVC-U frame

5TH

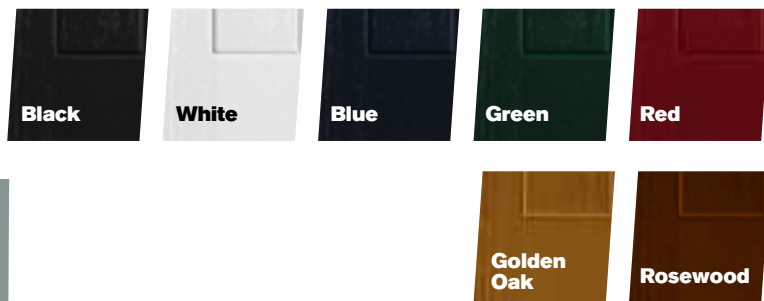

the Prestige Colour Range

Let us inspire you with our selection of 36 Bespoke colours specially chosen for you. Available on any of our Traditional, Contemporary, Cottage and Stable doors.

Note: Whilst every effort is made in the printing process to replicate the RAL colours shown here, subtle shade differences may occur. For a more accurate representation of the colour please ask your installer to show you their 'Colour Swatch Book.'

balmoral

caernarfon & rochester

One of our most popular designs the Balmoral is a classic Georgian style door but with the availability of a vast selection of modern and traditional glass designs to add that personal touch.

Similar to the Balmoral's twin glass design are the Caernarfon and Rochester doors.

The Caernarfon has a rounded top offering a softer dimension to the glazing area whilst the Rochester's 'eye brow' design offers an elegant feel.

Stable Doors, Side Lights & Double Doors

SafeGuard Composite Doors also offer a range of stable doors complimentary side lights and a comprehensive range of double doors. All manufactured to the same exacting standards utilising the full range of colours and designs. [limited choice on side lights.]

A stable door is the ideal solution for a back door, yet is also suitable for a front door too. The stable door whilst secure and offering improved thermal performance is by the nature of its construction ideally designed for use only in sheltered locations. Ask your installer for more details.

Stable Door Range

Additional glass ranges available.

SIDE LIGHTS

When you need more than just a door.

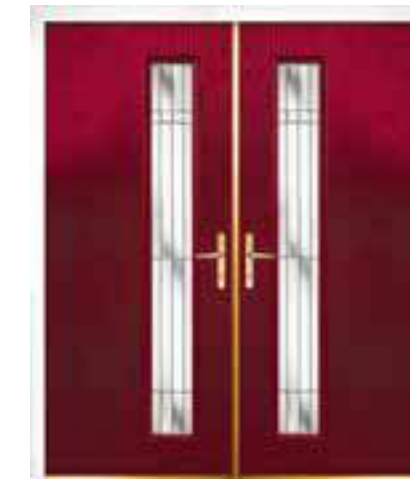

Many doors also have side panels that extend the decorative glazing over a wider area and make a stunning design statement. Our Balmoral, Caernarfon and Rochester doors also have matching side panels

available, allowing you to upgrade that perfect design statement. The side panels offer all the benefits of our GRP composite doors and mean you can create the complete entrance.

Easy to operate High Security adjustable multipoint locking systems are also included as standard.

THE SAFEGUARD DOUBLE DOOR RANGE

Stunning Aesthetics

For those of you with a Grand Entrance to create then look no further than a SafeGuard 'Double Door' set.

Based on our existing Traditional & Contemporary door ranges a pair of matching doors can be brought

together to create that stunning entrance only limited in design by your own imagination. Any of our double doors can also be created using any of the Prestige colours (see page 10)

24TH and finally...

...whatever design, style or colour
- we can promise your new front door
will be a beautiful addition
to your home.

SafeGuard
COMPOSITE DOOR COLLECTION

www.safeguardproducts.co.uk

Door and glass colours shown in this brochure should be used for guidance only as the limitations in photographic and printing processes may mean that colours of products vary from those illustrated. All doors are provided with white internal skins, as standard, although Golden Oak and Rosewood are also available stained on both sides. Bespoke coloured doors as per page 10 can be painted on one or both sides. All information in this publication is provided for guidance only and is given in good faith. SafeGuard reserve the right to alter specifications without prior notice. All images are for illustration purposes only. SafeGuard have a policy of continuous improvement and reserve the right to change specification and designs at any time without notice. Please check with your installer prior to ordering to confirm availability of your specification requirements.
